SHARAD KUMAR

Growth and Go-To-Market, Solution Architecture & Delivery Transformation Leader
Email: sharad.rsg@gmail.com Phone: +91 99 80 796 383
LinkedIn: linkedin.com/in/sharad-kumar-11264247 Portfolio: sharad-kum.github.io

EXECUTIVE PROFILE & VALUE PROPOSITION

Hands-on senior leader with over three decades of verified experience operating at the convergence of commercial strategy, enterprise systems engineering, and global delivery operations across Capgemini, Tech Mahindra, Wipro, Accenture, and HCL Technologies.

Highly specialized in bridging market prospects with technical execution to deliver predictable business outcomes, stabilize high-risk portfolios, and implement governed multi-model enterprise AI architectures. Adept across the Americas, UK/Europe, ANZ, and ASEAN markets; also available for interim leadership, turnaround mandates, and advisory consulting.

CROSS-FUNCTIONAL ENTERPRISE MATRIX

- **Business Turnarounds:** Consistently salvaged underperforming markets, techno-commercial solutions, and delivery organizations
- **Growth & GTM Execution:** 65%+ win rate, 75%+ hit-to-win ratio, 28% partner-led revenue engine, and 30% expansion in average deal ACV.
- **Solution Architecture:** 6,000+ applications migrated, $20M USD DevOps practice incubated in Year-1, and 40%–60% faster release velocity.
- **Delivery Excellence:** $300M+ SBU rebuilt, scaled global CoE to 425+ FTE in 18 months, and 45% operational cost reduction.

KEY CONTRIBUTIONS

AI-Enabled Work

- Extended existing ELA and joint-GTM partner playbooks into AI-enabled, consumption-based pricing constructs — repositioning AI capability as a joint value proposition rather than a standalone pitch, sharpening pursuit qualification against repackaged-automation competitors.

- Architected a governed, multi-model AI operating model — mapping workloads to model tiers and embedding governance guardrails across an enterprise-wide AI ecosystem, anchored to fitment, control, and cost rather than a single platform roadmap.

- Deployed AI-driven incident correlation, ML-based anomaly detection, and a historical knowledge graph across Aviation ITOps operations — collapsing a multi-hour incident chain and shifting engineers from repeatable triage to complex problem-solving.

- Applied ML-based classification models to validate application segmentation during a 6,000+ application cloud migration — turning months of manual assessment into weeks and building a defensible, data-driven prioritization model years ahead of AI becoming mainstream in delivery tooling.

GROWTH AND GTM

- Improved win probability by 25 to 30 percent and reduced qualification cycle by 15 to 20 percent by embedding AI-assisted competitive benchmarking and structured deal qualification into the pursuit lifecycle
- Led end-to-end RFI, RFP, and RFQ lifecycle with structured bid governance, achieving 65 percent or higher win rates and improving average deal ACV by approximately 30 percent
- Built partner-led GTM engines contributing approximately 28 percent of revenue through joint offerings, co-innovation frameworks, and ELA finalizations with HP, IBM, CA Technologies etc.
- Drove 20 percent improvement in lead qualification through analyst engagement, executive forums, keynote presence, and global demand generation programs

- Incubated 20M USD DevOps practice with margin resilience in Year 1 and developed differentiated commercial models including pay-per-use, subscription revenue-sharing models
- Built B2B engine with global and market-level service providers enabling skill augmentation at scale and accelerated market entry across geographies

SOLUTION ARCHITECTURE

- Led enterprise-scale cloud transformation of 6000 or more applications using 7R principles achieving 30 percent faster migration, 25 percent cost optimization, and near-zero failure rate
- Designed API-first digital ecosystems across customer, commerce, BPM, and channel layers reducing release cycles by approximately 25 percent and defect rates by 30 to 40 percent
- Built lifecycle automation platforms with CI/CD orchestration, service virtualization, and shift-left and shift-right security controls accelerating release velocity by 40 to 60 percent and reducing failures by 30 percent
- Developed Digital Health, Commerce, Marketing, and Omni-channel solutions and extended Digital Health into Digital Life and Health for insurance underwriting with regulatory compliance
- Built real-time data analytics and observability frameworks achieving 35 percent faster issue resolution through KPI-driven balanced scorecard governance and AI-driven predictive modelling
- Delivered TCO and ROI modelling with hybrid and multi-cloud constructs for B2C digital transformation and led OCM initiative with RACI definition and workforce transformation

DELIVERY EXCELLENCE

- Built and scaled global Delivery CoE from 34 to 425 FTE across 7 business lines in 18 months through pyramid structuring, multi-skilling, and process discipline improving cost efficiency by approximately 45 percent and accelerating readiness by approximately 48 percent
- Turned around a red-flagged 43-FTE engagement, and scaling to 180 FTE in 10 months while reducing defects by 40%, regression time by 60% and restoring stakeholder confidence
- Rationalized 3000 or more QA artefacts into fewer than 350 reusable plug-and-play workflow components achieving 32 percent cost reduction, 29 percent faster readiness
- Embedded AI/ML-driven predictive models for defect prediction, risk scoring, and capacity planning across globally distributed enterprise programs enabling proactive quality governance and risk mitigation
- Implemented multi-vendor governance and KPI-driven live balanced scorecard dashboards enabling real-time informed decision-making across globally distributed stakeholder cadences
- Established automated progressive regression frameworks from development through production certification reducing regression cycles by 40 percent and accelerating releases

CAREER HISTORY

- Independent Advisor, Consultant – Global Leadership Roles: 2018 to Present
- Capgemini India Pvt. Ltd.: Director, Associate Director – 2015 to 2017
- Tech Mahindra: Enterprise Consultant and DevOps Leader – 2011 to 2015
- Wipro Technologies and Consulting: Practice Head, Consulting Partner – 2007 to 2011
- Accenture Services Pvt. Ltd.: Portfolio and Program Manager – 2005 to 2007
- Earlier Roles: HCL Technologies Ltd., Metamor Global Solutions, ACE Technologies, Holiday Inn Krishna, OMC Computers, The Krishna Oberoi, 1988 to 2000

EDUCATION

- Post Graduate Diploma in Computer Studies, National Computing Centre, United Kingdom
- Graduation, Delhi University

ACHIEVEMENTS AND RECOGNITION

- Winner, DevOps Global Chalk Talk Challenge | Certified SME, Digital Transformation Strategy
- Acknowledged Contributor, Globally published Testing Practitioner Handbook | Keynote and Plenary Speaker, Jury and Advisory Panel Member at National and International forums
- Member, Asia Cloud Computing Association, Singapore and Data Classification Workgroup
- Best Business Operator, Accenture, and multiple ACE Awards and contribution acknowledgements
