Growth and transformation leader with deft of experience driving GTM strategy, Techno-Commercial solution, and globally distributed delivery at scale across Capgemini, Tech Mahindra, Wipro, Accenture, and HCL, spanning Americas, UK and Europe, Australia, New Zeeland, and ASEAN.

Known for turning around at-risk portfolios, closing multi-million-dollar pursuits at 65 percent or higher win rates, building revenue-generating platforms including a 20M USD DevOps practice in Year 1, and leading enterprise-scale transformations across cloud, digital, and delivery.

IMPACT SNAPSHOT

$300M SBU Rebuild | 425+ FTE Delivery Portfolio | $20M Practice Incubated | 75%+ Hit-to-Win ratio | 6,000+ Apps Modernized | 9 Geographies Built | $13M Portfolio ACV | Salvaged Red-Flags | $47M P&L Ownership

SECTION 1 — AI-ENABLED WORK

1.1 AI in Growth & GTM

Extended existing ELA and joint-GTM partner playbooks into AI-enabled, consumption-based pricing constructs — repositioning AI capability as a joint value proposition rather than a standalone pitch, sharpening pursuit qualification against repackaged-automation competitors.

1.2 AI in Solution Architecture

Architected a governed, multi-model AI operating model — mapping workloads to model tiers and embedding governance guardrails across an enterprise-wide AI ecosystem, anchored to fitment, control, and cost rather than a single platform roadmap.

1.3 AI in Delivery Excellence

Deployed AI-driven incident correlation, ML-based anomaly detection, and a historical knowledge graph across Aviation ITOps operations — collapsing a multi-hour incident chain and shifting engineers from repeatable triage to complex problem-solving.

1.4 AI in Practice — Early Adoption (2017)

Applied ML-based classification models to validate application segmentation during a 6,000+ application cloud migration — turning months of manual assessment into weeks and building a defensible, data-driven prioritization model years ahead of AI becoming mainstream in delivery tooling.

SECTION 2 — GROWTH & GO-TO-MARKET

2.1 Market Intelligence & Competitive Positioning

Identified whitespace opportunities and quantified growth headroom through geography-specific strategies including competition analysis — integrating proprietary and joint accelerators and solutions to sharpen value propositions and win probability.

2.2 Pursuit Leadership & Deal Closure

Managed end-to-end RFI/RFP/RFQ lifecycle with stage-gated qualification, bid/no-bid governance, and funnel hygiene — led proposal defence workshops, negotiation roundtables, and commercial structuring for multi-million-dollar globally distributed pursuits.

2.3 Partnerships, Alliances & Joint GTM

Forged ELAs and co-GTM frameworks with HP, IBM, CA Technologies, Microfocus, Conformiq, and Smartesting — operationalising platform-integrated joint hosting & offerings in subscription based pay-per-use along with joint operate and commercial models with partners.

2.4 Brand, Thought Leadership & Demand Generation

Delivered keynote and plenary sessions, analyst briefings, and roundtables nationally and internationally on DevOps, Digital Transformation, AI Adoption, and PaaS — contributed to globally published Testing Practitioner Handbook and co-authored DevOps White Paper.

SECTION 3 — SOLUTION ARCHITECTURE & TECHNO-COMMERCIAL SOLUTIONING

3.1 Cloud & SaaS Transformation

Architected 7R-based cloud transformation strategy (Re-host, Re-platform, Refactor, Retire, Retain, Relocate, Repurchase) for 6,000+ application migration across hybrid and multi-cloud constructs — incorporating TCO/ROI modelling, phased roadmaps, and workload placement.

3.2 Digital Transformation & API Gateway

Architected API-first digital ecosystems integrating customer, commerce, BPM, and channel layers — engineered secured API gateway for centralised governed consumption; developed Digital Health, Digital Marketing, and Omni-channel cloud-hosted solutions.

3.3 DevOps, Secure Engineering & CI/CD Automation

Conceptualised and blueprinted lifecycle automation platform — integrating Service Virtualisation, Release Automation, and Model-Based Testing for end-to-end automated test design through delivery; deployed as PaaS on cloud in Pay-per-Use model.

3.4 Data, Analytics & Observability

Built real-time telemetry and observability frameworks with KPI-driven governance, anomaly detection, and predictive defect models — enabling SLA adherence, delivery predictability, and continuous improvement enhancing the trust in within stakeholders.

SECTION 4 — DELIVERY LEADERSHIP & PROGRAMME EXCELLENCE

4.1 Global Delivery CoE — Build & Scale

Scaled Testing CoE from 34 to 425+ FTEs in 18 months across 7 business lines — implemented federated EPMO governance, authored QA&E Process Handbook and Multi-Vendor Governance Framework; developed estimation model and ROI automation identification tool.

4.2 Turnaround & Hyper-Scale Delivery

Stabilised 43-FTE red-flagged engagement and accelerated to 180 FTE in 10 months — reset balanced scorecard governance and structured stakeholder cadences; architected in-sprint progressive automation and intelligent regression from dev through production certification.

4.3 Enterprise Cloud Migration Execution

Executed 6,000+ application migrations using 7R strategies — established factory-modelled deployment pipelines with automation at scale; led governance and escalation frameworks across globally distributed multi-vendor teams.

4.4 Predictive Modeling & Intelligence-Driven Delivery

Implemented risk scoring, defect prediction, and impact-based prioritisation models enabling early risk detection, quality forecasting, and capacity optimisation driving engagements in consultative model across globally distributed programmes

CAREER PROFILE

Consultant / Advisor / VP / Director: *Independent — Global Engagements* **Jan 2018 – Present**

- AI ecosystem onboarding and AI Systems Design consulting for enterprise and eCommerce clients — see AI-Enabled Work section
- C-suite advisor for Business Growth Roadmap, Technology Ecosystem and Delivery Transformation
- Roles included: Global Head, P&L owner & Workforce Transformation, Accounts Director for Advanced & Data Engineering, Enterprise, GTM & Solution leader for niche service provider
- Key engagements: Led Open API and SDLC automation strategy with a US product vendor; drove Digital/Mobility, DevOps/Agile maturity, Delivery CoE, and partner/pursuit development for a Singapore-headquartered consulting firm across ASEAN, Africa, and the Middle East; defined GCC setup strategy for an Australian logistics provider; Standardized AI-enabled engineering tool ecosystems for globally distributed teams within a European retail organization
- Key entrepreneurial initiatives: Incubated, Stabilized & Transitioned – EPMO offering, B2C consulting platform around Digital Transformation, AI & Cloud adoption, DevOps, Lifecycle Automation and Inter system / businesses integrations, B2B skill augmentation partnerships

Director / Associate Director: *Capgemini India Pvt. Ltd.* **Jun 2015 – Dec 2017**

- Solution architect, pipeline owner and revenue resilience leader for a top-line-initiative globally
- Developed digital user journeys (Digital commerce, Digital Health, Digital Doctor, Digital Marketing) with POVs on ML; developed Data Upload, Extraction, Migration, Validation, and Integration strategy; led techno-commercial solutions large deals and leading proposal defence workshop; developed and rolled out API Gateway Management in Platform-as-a-Service model
- Drove assessment and definition of go-to-market strategy during organizational merger, ensuring alignment across accounts and market segments
- Exceeded engagement growth targets — scaled 80 to 180 FTE in 10 months across Digital, EBS, Data & Analytics, SFDC, and Web; drove in-sprint progressive automation in continuous deployment environment improving time-to-delivery and cost for an at-risk engagement with cloud provider
- Led cloud migration strategy for 6,000+ applications (US-based conglomerate: Aviation, Medicare, Lighting, Oil & Gas) using 7R / 'As a Service' framework;
- Led Process Maturity Assessment for Philippine telecom and Environment & Data Management for Finnish financial group.
- Responsible for portfolio P&L and CM optimisation across multiple SOW models with knowledge retention continuity; led client workshops, proposal defence, and strategy sessions.

Enterprise Consultant & DevOps Leader: *Tech Mahindra* **Oct 2011 – Jun 2015**

- Core leader in revival of $300M SBU; Global Head — DevOps & Lifecycle Automation Platform: conceptualised, incubated, and scaled from blueprint to commercial offering; achieved 75%+ hit-to-win ratio and noticeably exceeded yearly business targets; incubated $20M+ DevOps practice in Year 1. Tracked and reported practice performance against agreed KRAs monthly and quarterly.
- Established and ramped DevOps, Digital, Data, Virtualisation, Cloud & Crowd practices leveraging partners (CA Technologies, HP, Microfocus, IBM, Conformiq, Smartesting); finalised ELAs in joint go-to-market models; introduced Pay-per-Service model via Service Virtualisation factory; deployed PaaS on cloud in subscription model integrated with flexibility of Pay-per-use concepts
- Developed BVA models, tool matrices, questionnaires, and TMMi-aligned process improvement roadmaps; defined in-premise and cloud-based CoEs, shared services, and factory-based delivery organisations; strategized automated environment and data management service lines.
- Led prospect and client roundtables, cultivated analyst and partner ecosystems, and partnered with global forum owners to drive keynote speaking engagements

Practice Head / Consulting Partner: *Wipro Technologies & Consulting* **Jul 2007 – Oct 2011**

- Practice Partner, Principal Consultant & Delivery Enabler for V&V practice within Wipro Technologies & Consulting Services; Global Head and P&L owner for Performance Engineering practice — architected SaaS Performance Engineering Lab in Pay-per-Use model on cloud (first for the organisation), Led consulting engagement to map the "As-Is" to "To-Be" transformations
- Developed market-focused strategy with ROI analysis for new service lines: Predictive Capacity Modelling, Performance Benchmarking, System Monitoring, Profiling & Tuning, and Performance Optimisation; negotiated ELA models with HP, IBM, Hyperformix, and TeamQuest; co-incubated MDM/ETL, Webservices and Functional automation practice leads.
- Led large strategic pursuits and cross-organisation practice growth; salvaged at-risk programme through model-based prediction approaches; established practice maturity model, competency portal, and training/seminar cadence on latest trends and offerings.
- Solution architecture for Target Operating Models; coordination between Practices, Verticals, Tools, and Support functions; tool evaluation and market alignment; introduced Test Factory and shared delivery model reducing costs through resource and knowledge sharing.

Portfolio & Program Manager: *Accenture Services Pvt. Ltd.* **Sept 2005 – Jun 2007**

- Testing CoE — Top American bank: Delivery lead across Functional QA & Automation, middleware Component Integration, Performance, Infrastructure management for Consumer and Wealth Management LOBs — scaled team from 34 to 425 FTE in 18 months across 7 business lines.
- Developed Estimation Model, ROI tool for automation candidate identification, QA&E Process Handbook, and Multi-Vendor Governance Framework; spearheaded productivity tracking and action plans for managing contractual productivity targets.
- Assessment Team member for CMMI; Master Culture Coach conducting organisational culture training sessions; lead speaker at organization level during staff on boarding sessions

Project Leader: *HCL Technologies Ltd.* **Mar 2000 – Aug 2005**

- QMS Co-Owner; Lead Auditee for ISO audits; Lead Speaker at international workshops;
- Delivered multiple project engagements across top USA, Canada & UK based BFS & I and Legal & Professional Information Services provider focused on Information and Data & Analytics services
- Delivery lead for web-based application test support (integration, performance, regression) — effort sizing, resource planning, release scheduling, and senior management reporting.
- Delivery Lead for Image Mark Proof of Deposit (Check21 clearing) workflow application for automating bank data processing centre balancing systems; managed scope, resource deployment, and test execution with creation of Silk Test automation scripts.

Earlier Career (1988 - 2000)

Metamor Global Solutions, ACE Technologies / FCS Software, LK Global Software Engineering, Holiday Inn Krishna, OMC Computers, The Krishna Oberoi

EDUCATION

Diploma in Computer Studies National Computing Centre, United Kingdom
Graduation Delhi University

ACHIEVEMENTS & RECOGNITION

Certified SME — Digital (SMACT) Strategy & Transformation
Co-Author — Testing Practitioner Handbook (global publication)
Member — Data Classification Workgroup, Asia Cloud Computing Association
Winner — DevOps Global Chalk Talk Challenge
Author — DevOps White Paper, Lifecycle Automation, Delivery Process, Multi-Vendor operate model
Jury / Advisory Panel Member / **Keynote & Plenary Speaker** — National & International forums
Best Business Operator — Operational Excellence, E2E Automation Framework
Letter of Appreciation — Agency of Defense Development, South Korea (Speaker)
Certificate of Appreciation — Offshore Facility Setup, Process & Documentation Framework
